MATH

Create a number sentence that uses at least 6 stamps. Your number sentence can use a combination of adding, subtracting, multiplication, and division. Find and paste the stamps on your paper. Use math symbols between the stamp pictures to show your number sentence. Then either find and write what the number sentence is equal to OR write the answer in a box.

StampVentures

MATH

Create four math equations using subtraction. Find and glue the stamps onto your paper. Don't forget to use math symbols in your number sentences.

StampVentures

MATH

How many different ways can you make 10¢? Use the denominations of the stamps for your numbers. Find and glue them onto your paper. Don't forget to use math symbols in your number sentences.

Example: $8¢ + 2¢ = 10¢$

StampVentures

MATH

Find 18 stamps - they can be the same or different. Pretend that you are going to make 3 stamp albums - one for you and two for your friends. Show how you would divide the 18 stamps into 3 groups. Now glue the stamps onto paper showing the three different groups.
